NATO INTERCONNECTING PONTOONS

4.2M X 2.1M Fully Expandable Pontoon System

Typical Uses

- Piling Platform
- Low Freeboard Access
- Maintenance Work on Water
- Floating Dock
- Temporary Bridges
- Bridge Access for Inspections & Maintenance
- Floating Event Platform
- River Transportation
- Dredging

NATO INTERCONNECTING PONTOONS

4.2M X 2.1M Fully Expandable Pontoon System

Additional Features

Crane systems can be mobilised onto pontoon units quickly via multiple bolted connections into deck.

All cranes are provided with a stability book and load calculations for all planned lifts and once the deck crane is installed it can then be used to self load other project equipment and set up working deck.

Crane systems are supplied with qualified operators.
