

Schottel MB3 PUSH BOAT

Extremely versatile & powerful shallow water push boats suitable for barge transportation duties working in tidal and high flow watercourses

General

Make	Schottel
Type	MB3 Push Boat

Main Dimensions

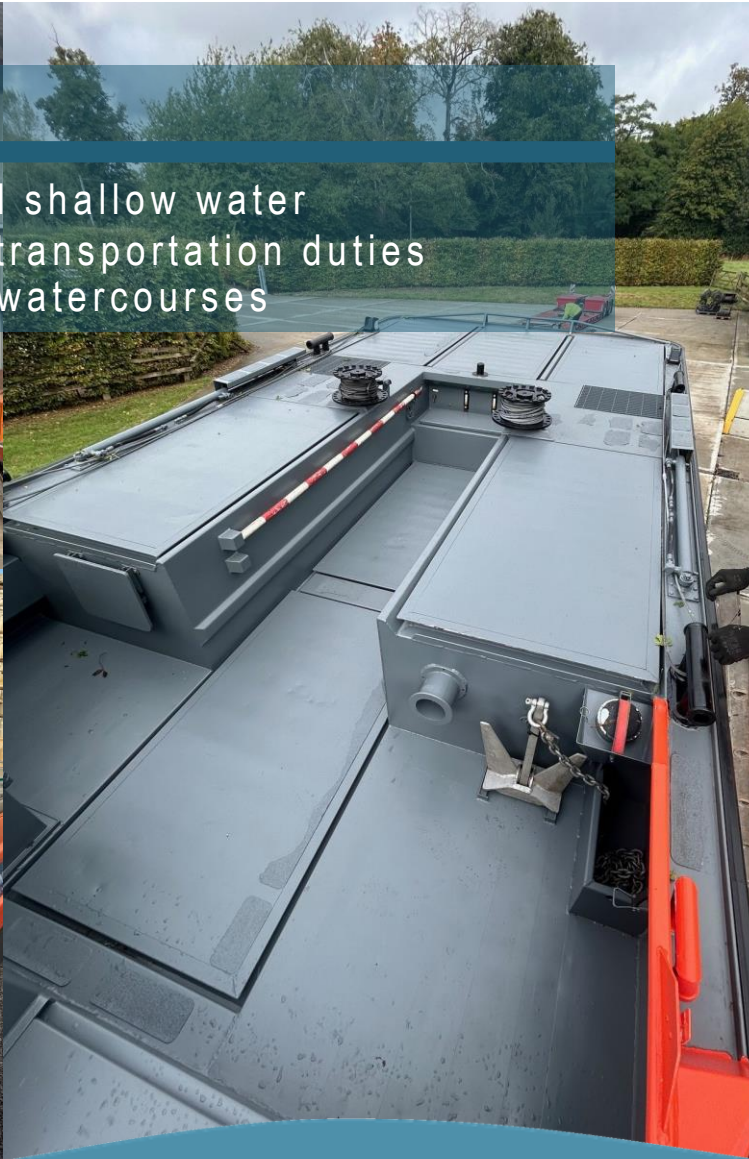

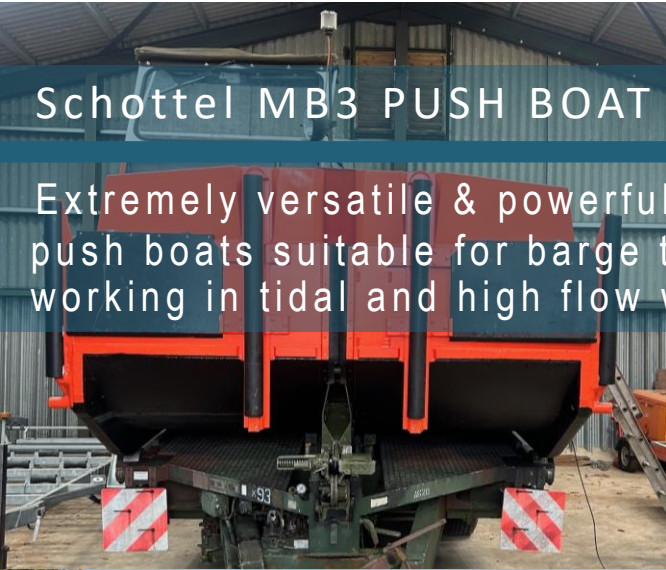

Length	7.0m
Breadth	3.0m
Draught	0.45m
Weight	5000 Kg
Bollard Pull / Push	2.25t
Speed	17 knots
Construction	Aluminum

Standard Equipment

- Twin Inboard Deutz BF6L913C 168HP providing 316HP
- Twin Schottel Water Jet Propulsion
- 360° Rotation Water Jets
- Hydraulic Steering
- Push Bow
- Hydraulic Vessel Connection Tensioning Rams / Cables
- Manual Secondary Hand Winches
- Operator Spray Cab
- Navigational and Working Lights

Benefits

- Ultra-Shallow River Push Boat
- Lightweight and Highly Manoeuvrable
- Twin 360° Steerable Propellers

A powerful, highly manoeuvrable and compact push boat suited to inland, shallow water barge transportation on dredging and marine construction projects. Utilising 360° azimuth water jets provides unparalleled manoeuvrability allowing vessel to turn in its own length.
